

SafeBeat™

“Screening Hearts, Saving Lives”

www.safebeat.org

Coming **SOON** to
YOUR school...

Protect your child today!

The Facts:

- ◆ Approximately 80% of sudden cardiac death in youth did not have a prior symptom... their first symptom was death.
- ◆ Standard physicals do NOT replace preventative heart screenings.
- ◆ Each year, approximately 7,000 children (ages 6 -18) needlessly die from SCA. **SafeBeat** preventative heart screenings can help prevent these deaths from occurring.

For more information

Is your child safe?

SafeBeat is a 501c3 foundation with a mission to “Screen Hearts, Save Lives” and create a healthier generation! Thanks to the compassion and generosity of Leon County Schools, Tallahassee Memorial Hospital & Wolfson Children’s Hospital, **SafeBeat** is able to bring its life-saving program directly to your child’s school.

Sign-up today!
